## About Us

---

EGME was established in 2005 in the United Arab Emirates. In the course of more than a decade activity, EGME has become one of the major suppliers to the Oil and Gas, Petrochemical, Chemical and Water Industries all over the world.

EGME provides comprehensive engineering, procurement, fabrication and construction services from conceptual design through evaluation, purchasing and know-how manufacturing. With its strategically located manufacturing facilities and partners that are dedicated to integrated high quality

manufacturing and prompt delivery of products and services, EGME has pioneered in complete engineering, design, fabrication and supply services for process equipment packages, pressure vessels, storage tanks, process piping, and structural steels. EGME is also specialized in turn-key storage tank terminals, oil & gas facilities, steel structures, pipeline construction as well as trading services for valves, pipes, steel material, electrical, instrumentation, automation, HVAC and firefighting equipment.

“EGME has pioneered in complete engineering, design, fabrication and supply services for process equipment packages, pressure vessels, storage tanks, process piping, and structural steels.”

## Our Corporate Philosophy

---

We, EGME and our partners accept quality and health & safety as the fundamental principles of our businesses. We are dedicated to delivering exceptional services and products via constant research and development, talent acquisition and trainings.

Health & safety of our employees as well as the communities where we operate are at the core of our business. EGME implements occupational safety and strives to reduce possible hazards and accidents with its ZERO ACCIDENT philosophy.

“Health & safety of our employees as well as the communities where we operate are at the core of our business.”

## Our Mission and Vision

---

Our mission is to provide the best quality products and services to our customers with respect to the different cultures, societies and law systems.

Our vision is shaped through our values:

- Sustainable growth
- Excellence
- Innovation
- Engaging people
- Working in partnership for the communities and environment

“We continue to strive for the highest standards and low cost operations all around the world.”

## Capabilities

---

### Engineering

EGME is fully capable of comprehensive engineering services from design, calculations, detail engineering, drawings and mechanical datasheets including electrical, instrumentation, mechanical, process and piping engineering. Our professional team is dedicated to offering safe, reliable and cost effective engineering services to our clients all over the world.

### Procurement

EGME provides everything from valves, pipes, steel material, electrical, instrumentation, automation, HVAC and firefighting equipment to process equipment packages, pressure vessels, storage tanks, process piping, structural steel as well as turnkey storage tank terminals, oil and gas facilities, steel structures and pipeline constructions.

Our experienced procurement team offers worldwide sourcing of quality material and equipment promising the best deliveries at the lowest cost using our quality and approved material identification system. With our extensive database of suppliers and manufacturers EGME offers customer oriented services to provide the best suitable and approved material and products, which meet the project needs in addition to the project budget.

### Fabrication and Manufacturing

We are dedicated to fabricating products and equipments in compliance with the international applicable codes/standards and with project/customer specifications. EGME's strategically located fabrication facilities delivers storage tanks, heat exchangers, filtering skids, process

equipment, structural steel, piping spools, and custom made welded steel parts. EGME's wide spectrum of manufacturing capabilities include almost all kinds of storage tank equipment, such as external and internal floating roofs, suction pipes, firefighting equipment, breather valves, and flame arresters.

### Construction

With our wide network of engineering, manufacturing and construction resources, EGME is specialized in complete turnkey and modular solutions for the bulk liquid and gas storage terminals, field construction, mechanical installation, piping and commissioning of import and export storage terminals, marine pipeline, which connects the terminals with the vessel loading/unloading docks, engineering, design, prefabrication, and erection of atmospheric storage tanks, fixed roof and floating roof tanks and biodiesel & naphtha storage facilities in compliance with internationally accepted standards and customer needs.

Our construction services include construction management, construction supervision, evaluation, quality, health and safety assurance, experienced manpower including welders, equipment and instrument technicians, fabricators, riggers and electricians, supervisors and field engineers.

Thanks to EGME's successful project executions across the industries and regions we continue to strive for the highest standards and low cost operations all around the world.

A large, teal-colored industrial storage tank is the central focus of the image. It is situated in a spacious industrial facility with a high ceiling and large windows. The tank is supported by a teal-colored metal stand. In the background, another similar tank is visible, and the overall environment is one of a busy manufacturing or storage yard.

## Products & Services

### **Manufacturing & Fabrication:**

Complete engineering, design, fabrication and supply services for process equipment packages, pressure vessels, storage tanks, process piping and structural steel

### **Engineering & Construction:**

Turn-key storage tank terminals, oil & gas facilities, steel structures and pipeline construction

### **Trading:**

Valves, pipes, steel material, electrical, instrumentation, automation, HVAC and firefighting equipment

## Some of our References

### National Oil Companies

### Private Oil Companies

### Major EPC & Service Companies
